

Hassle Free Patient Intake Mobile Solution

**With intakeNow, patients can easily fill out the check-in form on the iPad and instantly transfer it to the EHR.**

**Save Time. Enhance Efficiency.**

intakeNow is an intuitively designed mobile application which makes the entire patient intake process paperless. Coordinators at various healthcare organizations can utilize intakeNow to replace all the paper forms needed to complete a patient intake lifecycle, making the process error free, enjoyable and convenient for patients, coordinators and doctors.

### Express Patient Check-in

Save time onboarding patients with intake forms for the iPad

### Improve Registration Accuracy

Automating the patient check-in process reduces error and results in higher accuracy.

### Faster for Both Staff and Patients

With intakeNow, you can avoid having an overloaded lobby area and save a lot of time and energy for both staff and patients.

Through intakeNow, Coordinators can see a list of all the patients that have checked in for appointments at the front desk. Coordinators can then select a patient name they wish to process for intake. It is then displayed in an intuitive interface that will systematically guide the patient to complete all the necessary digital intake forms.

## Features & Benefits

### Privacy

intakeNow gives foremost priority to the privacy of patients. One of the salient features of this application is that at no point can one patient access the information of another patient using this application. Upon submitting the digital intake form the patients will be logged out of the application.

### Terrific User Experience

intakeNow provides the patient with a digital intake form interface that stresses heavily on superb user experience without compromising on the breadth of details captured. The application provides a seamless experience even to non tech-savvy users.
